

A brilliant new information system

Hotel Information Systems (H.I.S.) is a new computerised package from GEC Reliance to display information on television screens in hotel bedrooms.

It can be selected on a stand-alone basis, or automatically when radio is selected in a combined radio and TV system.

In either case, H.I.S. can be selected either direct on the TV set or through remotely controlled channel selection on a GEC Reliance bedhead control panel as part of a complete hotel room entertainment system.

H.I.S. enables you to provide information about your hotel direct to the guest's room. Tariffs, menus, emergency procedures, and even a welcoming message.

But more than this, it allows you to display local advertising, bringing extra revenue to your hotel, as well as information about local events, train, bus and air timetables, and so on.

The information is displayed in the form of colourful graphics which are more interesting and attention-getting than a straightforward listing. The details are easily updated, enabling you to provide up-to-the-minute information. And you can quickly change the information when necessary.

There's a wide selection of graphics available for use with H.I.S. displaying information attractively and instantly.

H.I.S. is just one of a number of products from GEC Reliance making up a total hotel package. For further information, please contact us, either at Wellingborough or your local area office. We'll be pleased to help you all we can.

There's more to GEC Reliance than just Hotel Information System

Although this brochure has dealt only with our Hotel Information System package, there's a lot more to GEC Reliance.

We supply, install and maintain an extremely wide range of advanced communications and business equipment, including

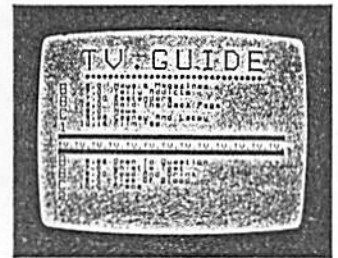

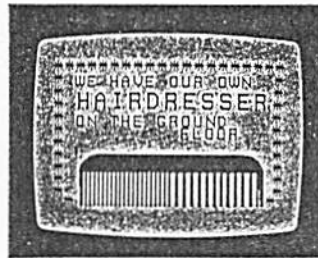

Telecoms
 Small and large digital PABX telephone systems
 Keysystems
 Workstations
 Telephones

Information systems
 Multifunction workstations
 Micro and mini computers
 Office automation systems
 Telex and Teletex interfaces

Security, communications and control
 Fire alarms
 Halon gas systems
